

CASE STUDY

TVS Quietstone / ABSorb Care Panels

Luton Dart

PROJECT INFORMATION

Project Objective

TVS Group was approached by Volkerfitzpatrick Kier to help improve acoustics on their Luton DART (Direct Air – Rail Transport) project.

While approaching the end of the project, it became apparent that the PA system was not audible in the Central and Parkway stations and TVS were asked to provide a speedy solution to the issue.

A solution was agreed and 1,273 of our TVS Quietstone Panels 1200 x 600 x 50mm were installed in Central Station and 220 TVS Absorb Care Panels 2750 x 1200 x 24mm were installed using fixing channels in Parkway Station.

The client is delighted with the reduction in reverberation and the PA system can now be clearly heard.

Products

TVS Quietstone Light Panels 1200 x 600 x 50mm

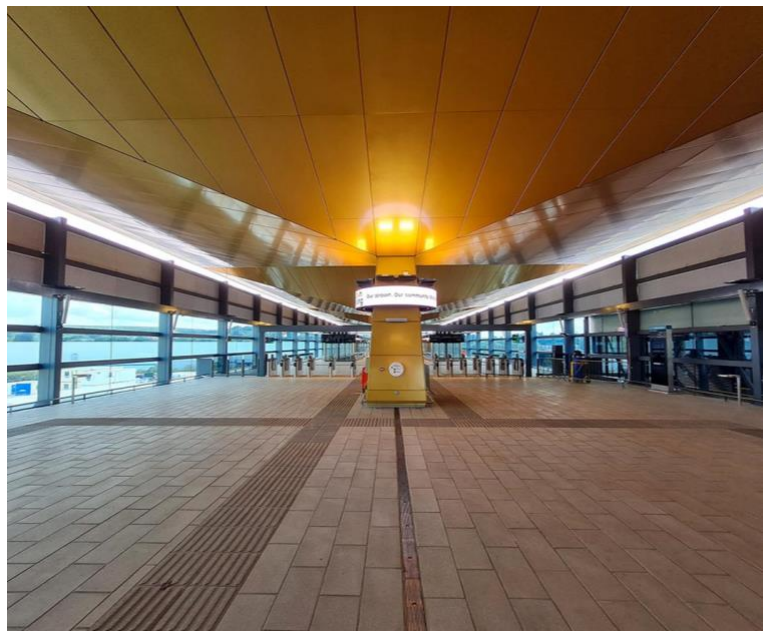

TVS Absorb Care Panels 2750 x 1200 x 24mm

Various fixing channels.
