So you – in your many guises

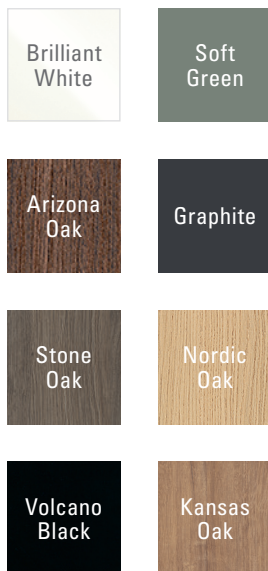

SO YOU - IN YOUR MANY GUISES

The Skylia collection unites design variety with a clear style and a fine sense of proportion: gentle curves meet precise lines, functionality meets aesthetics – opening up numerous options for combinations. Washbasins, furniture, tap fittings and toilets blend into a concept offering plenty of scope for individuality and style. The washbasin has won the renowned Red Dot Design Award for its flexible and timelessly modern design concept.

STYLISH VARIETY FOR MODERN BATHROOMS

The Skylia collection presents a clear design style and provides a framework for modular planning. Six washbasin sizes form the basis for a furniture system that can be combined in a variety of ways. Available in the widths 80 and 100 cm, with one or two drawers and the option of additional open compartments, the bathroom furniture offers flexible solutions for different room layouts. Eight surface variants and the matching More To See lite illuminated mirror round off the ensemble, bringing together everyday practicality and signature aesthetics.

HARMONY OF FUNCTION AND FORM

The tap fittings in the Skyla collection take up the elegant style of the ceramics while adding high-precision highlights to the bathroom – they are available in Matt Black or Chrome. In addition to the cold start washbasin tap fitting, the collection also includes taps in two different heights for the washbasin, as well as a wall-mounted model plus variants for baths, showers and bidets ensuring a consistent concept to cover all applications. Design and technology are perfectly coordinated: from the flowing aesthetics through to the details – such as the tap lever which reflects the design of the washbasin overflow.

INNOVATION MEETS DESIGN

The toilets in the Skyla collection unite modern design with an efficient flush. Equipped with the innovative TwistFlush technology – a swirling flush for powerful, thorough and water-saving cleaning – they offer hygienic comfort with minimum water consumption. Two different shapes, round or square, echo the design of the washbasin and create visual harmony. They are available in a choice of three ceramic colours: Stone White, White Alpine and Pure Black. A matching bidet complements the range.

WELL-CONCEIVED DOWN TO THE LAST DETAIL

The washbasins in the Skyla collection unite precision geometry with gentle transitions. The combination of angular lines and gently rounded details lends the design its characteristic balance. Available in six sizes and in Glossy or Matt White, they allow a broad range of solutions for bathroom concepts on any scale. The virtually seamless transition to the vanity unit underscores the clear unity of the overall design. Sophisticated features such as an oval overflow or asymmetric basin positions add striking highlights.

GREATER DESIGN SCOPE WITH SKYLA

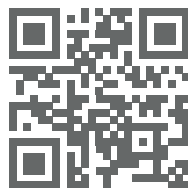

Whether you're designing a new bathroom or renovating an existing one, Skyla adapts flexibly to your needs and can be combined with a whole range of different bathroom collections. Form, function and style fuse into a coherent whole.
