Hour after hour.
Day after day.
Week after week.

Shower toilets should deliver reliability you can trust. Backed by decades of European manufacturing expertise, i.life E by Ideal Standard is a smart, practical choice for contemporary bathrooms. Combining modern aesthetics with intuitive controls, it offers a thoughtfully curated array of comfort and hygiene functions that deliver consistent, high-quality performance – time after time.

Everything you need to exceed expectations.

Shower toilets seamlessly integrate the refreshing cleansing action of a bidet with the everyday functionality of a traditional toilet, offering enhanced hygiene, greater comfort, and unmatched convenience.

Drawing on Ideal Standard's decades of expertise in bathroom innovation, i.life E offers reliable quality alongside a carefully selected range of features. With rear and front wash options featuring four spray modes, an integrated dryer, an automatic usage sensor, and a practical nightlight, every element is engineered to transform your everyday hygiene routine into a truly elevated experience.

Refreshingly clean, every time.

Enjoy personalised cleansing with four distinct spray modes: standard continuous, standard with oscillation, pulsating, and pulsating with oscillation. Adjust the water jet's position, intensity, and temperature using three heated settings from 24°C to 39°C – all easily controlled via an intuitive remote.

▼ Continuous Spray + Oscillation

▼ Pulsation | Oscillation | Pulsation + Oscillation

Gentle drying

The dryer provides warm and comfortable drying with 3 adjustable temperature settings ranging from 30°C to 50°C.

Rinse after rinse. Flush after flush. Dry after dry.

Designed with practical features and intuitive controls, the i.life E shower toilet effortlessly fits into your daily routine.

Intuitive operation

All functions are easily managed via the remote featuring large, intuitive buttons and clear light signals, ensuring seamless operation even for first-time users. The memory function recalls your last-used settings, while primary functions are also accessible via the side rotary button. For added convenience, the horizontally designed remote can be permanently mounted using the included installation frame or used as a detachable unit thanks to its magnetic docking station.

Night-time orientation light

A built-in sensor activates a gentle night light in low-light conditions, softly illuminating the side rotary button and the inside of the bowl. This thoughtful feature enhances visibility and convenience, especially for children and anyone who needs to use the toilet at night.

Sensor-controlled usage recognition

To ensure functions are only activated when needed, the i.life E shower toilet features a sensor-integrated seat that detects user presence. This added precision is particularly beneficial for families with children or use in hospitality settings.

Soft-close lid

The i.life E shower toilet features a soft-closing mechanism for the lid, preventing loud, accidental slamming.

- 1 Descaling programme
- Drying function
- Adjustable water pressure
- Adjustable nozzle position
- 2 Night-light
- 3 Soft-close lid
- Rear wash
- Front wash
- 3 temperature levels
- 4 Sensor-controlled usage recognition

Effortless hygiene.

For total peace of mind, the i.life shower toilet includes a range of hygiene features that ensure perfect cleanliness and long-lasting performance. A dedicated descaling programme – activated via expert mode on the remote control to prevent accidental use – effectively prevents limescale build-up. Simply add descaling solution to the designated opening to enhance longevity.

Additional smart features include pre and post-rinsing of the nozzle and a replaceable nozzle tip for superior cleanliness.

The toilet's rimless, wall-hung bowl ensures a powerful, thorough flush and effortless maintenance.

The i.life E shower toilet takes care of its own hygiene with automatic nozzle rinsing before and after each use.

Timelessly stylish design.

The i.life E shower toilet combines advanced functionality with a timeless, minimalist design. Its features are seamlessly integrated into the toilet and easily operated via remote control, creating clean, modern lines that harmonise effortlessly with any bathroom style.
