About Us

We're driven by our commitment to 'Making Waste Wonderful.' As a leader in the sustainable sector, we're dedicated to creating a better circular economy by transforming UK household and agriculture plastic waste into high-quality outdoor products.

Our Core Values:

SUSTAINABILITY: We're passionate about preserving the environment. Our sustainable practices reduce UK plastic waste, help in the drive towards Net-Zero and to promote a greener future.

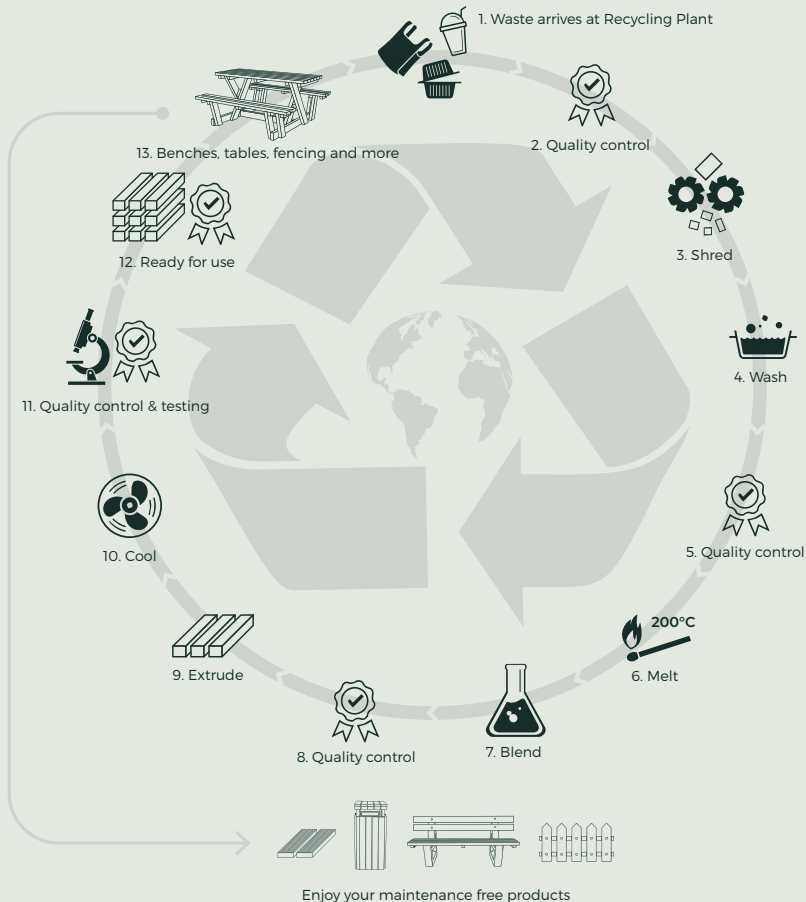

ACCESSIBILITY: We believe everyone should have access to eco-friendly, durable products. Our solutions are designed for all.

INCLUSIVITY: We embrace diversity in every aspect of our work, creating products that enrich lives and spaces for everyone.

Our Environmental Impact

We recycle over 350k tonnes of
UK Plastic Waste per year

1 British Recycled Plastic Picnic Table = 115kg CO2 delivered
Expected lifespan 75 years

1 Long-Haul Imported Pine Picnic Table = 236kg CO2 delivered
Expected lifespan 5 years

Customer Spotlight

It's In Nottingham - Creating Green Urban Areas with Parklets

Our Marsden Modular Planters and Seating Range

These planters, crafted from 100% recycled British plastic, not only diverted waste from landfills but also reduced the project's carbon footprint. Their durability and low maintenance made them ideal for the bustling city environment. By collaborating with Leonard Design Architects, the project team created adaptable and visually appealing parklets that enhanced public spaces. The planters provided a sturdy foundation for diverse flora, fostering biodiversity and creating inviting areas for everyone to enjoy. Nottingham's commitment to sustainability and quality makes their planters a standout choice for urban regeneration projects seeking to create beautiful and community wellbeing environments.

Caverley Tree Guard & Bench Seating

This versatile seating solution allows students to immerse themselves in the natural world while fostering a deep connection to their environment. Tailored to fit around existing trees, the bench creates inviting and sheltered spaces for learning, relaxation, and social interaction. By incorporating the bench into outdoor classrooms, Camphill Steiner Schools are cultivating a love for nature and promoting holistic child development. The wrap-around design encourages community building and shared experiences, while the tree itself becomes a living centre piece, providing shade, oxygen, and a sense of wonder.

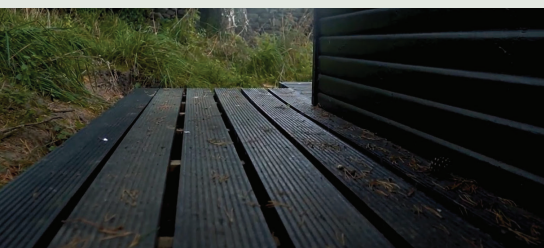

Our Most Popular Products To Improve Grounds

Hebden Recycled Plastic Grids. Two Grades Available, highly durable, permeable alternative surface for private driveways and pathways. SUDS-approved, no planning permission required for private properties.

Fencing replacement for long term investment. Recycled plastic fences are elegant, classic in design and very cost effective, showing that it is possible to use environmentally sustainable solutions without compromises.

Recycled plastic boardwalks, fishing pegs and dipping platforms are loved by parklands, conservation projects, wetland reserves and angling clubs up and down the UK.

Recycled plastic is the best possible material to use when building any aquatic based platform or fishing peg due to its extreme durability and ease of use when compared to wood.
