HYDROKLEAR SERVICES LTD

SERVICE & MAINTENANCE

THE PROBLEM

You know the situation old equipment that doesn't want to work any more. New equipment that doesn't seem to do what you originally purchased it to do. If you've got a problem, who can you call? - HKS. Whether your BAF doesn't support its bugs or the water from your softeners is harder than is acceptable it means that your plant is due for a service or some expert assistance.

THE SOLUTION

Although Hydroklear are well equipped to provide services for emergency call-outs, we can then follow through with maintenance and servicing to ensure that a catastrophic breakdown doesn't reoccur. We sell all manner of plants which means we've assembled expertise in most technologies. This places us in the advantageous position of being able to help a wide range of customers with a diverse set of problems, including dealing with other companies' equipment as well as our own. Our service engineers are trained to fix the problems in your systems and in some instances offer advice on how to improve systems, with no pressure to buy from us. We have servicing and maintenance agreements to suit most plants and if we don't have one that suits your particular needs, we can modify one so that it does. In addition we are able to offer the following services; Process/technical Support (On-site and Remote), Risk Assessments, HAZOP Studies, Plant Operation and Management.

THE RESULTS

The result you get from a servicing and maintenance agreement with Hydroklear is the peace of mind that if something goes wrong with your water system; whether it be waste, water or process; somebody is at the end of a phone waiting to help you. Or, when the chips are down, there will be a white van heading to your site.
